**HARPO**® is small and fold upable - you can even take it apart and take off the tires.

**HARPO**® was developed in cooperation with renowned harpists and has been tested for miles and miles so that your valuable harp will get to its destination safe and sound.

Developed for all concert harps and most single action harps. Numerous orchestras and soloists appreciate the comfort and safety of the **HARPO**®.

**All aluminium**, the weight is only about 7 kilos (13,5 lbs).

**,V' shaped padded rest** for the soundboard. The base folds up. Rubber parts on sides and base provide good protection.

**Two safety straps** included.

**Grips** are ergonomically designed.

**Foldable paddle**, comfortable and easy thanks to the spring mechanism.

**Stands stable** with base that folds up and down.

**Two 12.5" air-filled tires** (can be taken off), ideal for uneven ground, stairs, cobblestone or other hazards. The axles have quick-locks for easy removal of the quality tires.

Only about 60cm wide and therefore fits all standard doors, as well as elevator and train doors.

**HARPO**® with integrated wheel disc brake. This optional function is ideal for navigating steep slopes (such as ramps) with your instrument. This feature will still allow you to disassemble the wheels and use the folding function of the **HARPO**®.

This optional function will be installed upon request, please enquire directly with us regarding delivery times. Please contact us if you have any questions or queries.

# TransHarp®

## HarpTrolley

The **TransHarp** harp trolley is your easy-to-handle companion when it comes to transporting your precious instrument, whether you are on the way to a concert, your music lesson or moving from backstage to the stage...

...stairs, gravel walks, thresholds and cobblestone pavements are no longer a problem with your **TransHarp** ...

Because of its big, pneumatic-tired wheels (Ø = 12"), the **TransHarp** is versatile and comfortable and makes you feel safe in every situation.

Soft padding, perfectly placed bar ends, two tension belts and antiskid rubber on the base plate optimize its transport performance.

The **TransHarp** is a lightweight companion (5,5 kg), due to its light, yet sturdy aluminium construction.

Whether you have a single-action or a double-action pedal harp, you can always rely on your **TransHarp** trolley!
